Airline Safety Executive Summary

DSC640 Nicholas Salisbury Bellevue University

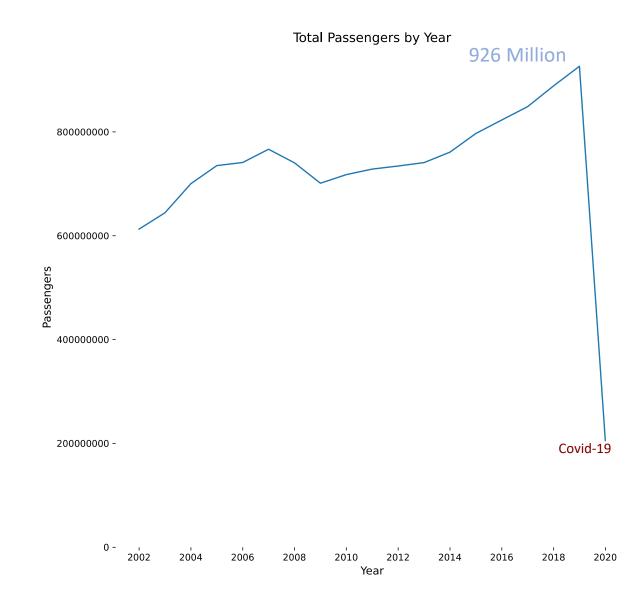

Income

- Events of 9/11 impacted income for several years
- The Great Recession in 2008 stunted growth
- Covid has caused a major hit in 2020
- Major global events impact income, not safety events

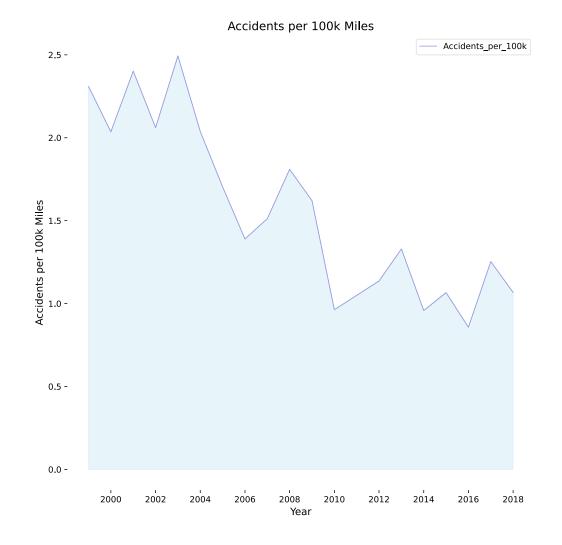

Passengers

- Major impacts to ridership are not caused by safety events.
- Global recession and pandemic have caused dips in passengers
- 926 Million Passengers in 2019!

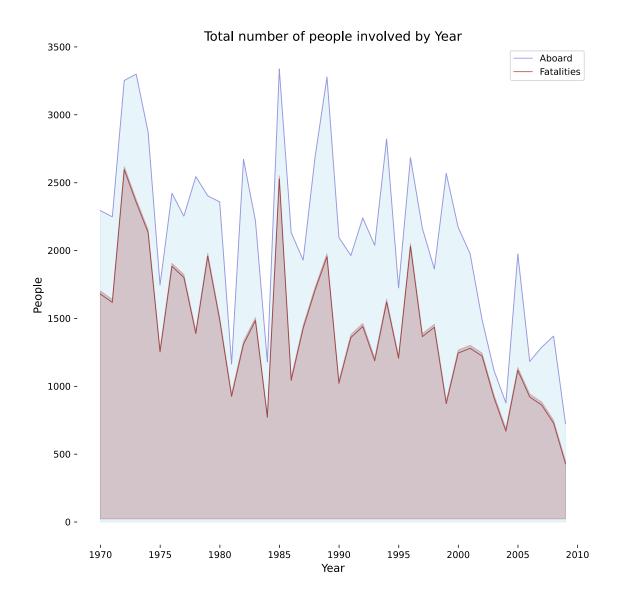

Air Travel is Safe!

Less than 1.5 accidents per 100,000 passenger miles for the last 10 years!

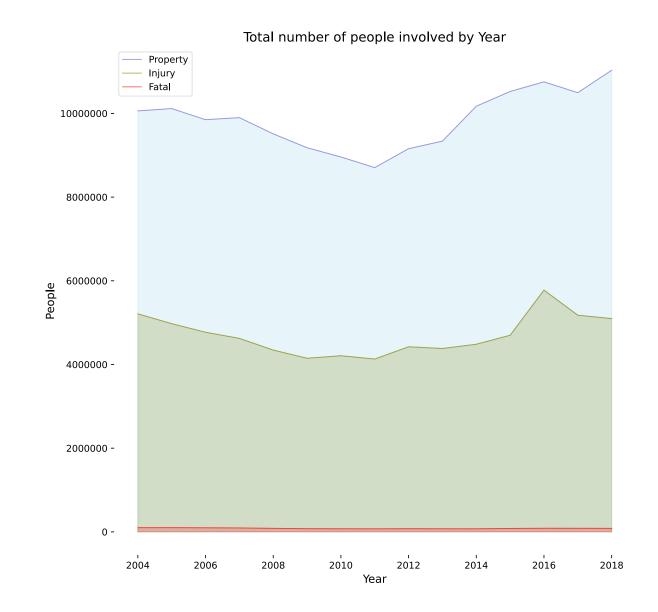

What can be improved?

- Survivability!
- In most years, airplane crashes result in a 50 to 75% fatality rate.

Car Accidents

- Over 15 million people involved car accidents in 2018
- Over 100,000 people involved in fatal car accidents
- But you hear about people having a fear of flying.
- But national media covers plane accidents

End of Year Employment Numbers

Airline Industry is Important

- Our safety record is impeccable
- Ridership is up, when there is not a global pandemic.
- And maybe most importantly
 - We provide jobs to hundreds of thousands of people
 - Allow families to connect across countries
 - Contribute to the overall global economy!
